### Tuscany Empowerment Actions for Migrants System

Dear parents,

The teachers and students of “ISIS Leopoldo II di Lorena” are pleased to welcome you and introduce you to their school. The Isis “Leopoldo II di Lorena” premises are located in Grosseto, in the “Cittadella dello Studente” in via de Barberi and in via Meda, in Gorarella district.

Since many students are attending our school some classes are also in via de ‘Barberi, at the Manetti Institute.

Students attend our school after junior school and get their High School certificate at our institute .

With their certificate they may attend all kinds of university or Higher Technical Institute.

Alternatively, our students may immediately look for a job.

The school offers many types of courses:

- |                                                                    |                         |
|--------------------------------------------------------------------|-------------------------|
| 1 <b>Technical Farming Course</b>                                  | via de Barberi          |
| 2 <b>Biotechnical and– Healthcare Course</b>                       | via de Barberi          |
| 3 <b>Vocational Farming Course</b>                                 | via de Barberi          |
| 4 <b>Vocational Hotel and Catering</b>                             | via Meda-Giolitti       |
| 5 <b>Vocational Services for Healthcare and Social Assistance,</b> | via Meda-Giolitti       |
| 6 <b>Vocational Beautician and Wellness operator Course,</b>       | via de Barberi/via Meda |

Istituto di Teoria e Tecniche  
dell'Informazione Giuridica

## **Technical Farming Course**

This address is aimed at students interested in environment and nature. The subjects are Agricultural and Food Production techniques , Land and Environment Management, Industrial and Farm Quality and Production Tracking Garantie Systems. After a two- year session students can choose between two post graduations:

- “**Environment and Territory Management** ”, with great attention to preservation and protection of the environment.
- “**Viticulture and Oenology**” with the study of Wine Production , Processing and marketing using Biotechnologies.

In addition to the “core subjects“ the syllabus includes Economics, Agricultural Evaluation, Marketing and Laws , Environmental and Land Management, Products Processing

## **Biotechnical and Healthcare Course**

This Course focuses on scientific subjects and studies the characteristics of the matter from the chemical, biological, chemistry and commodity-related point of view. Furthermore any environmental and health risk situation is analysed. At the end of the five- year course students will get their “Healthcare Biotechnologies” certificate and will be able to use the main healthcare technologies in the biomedical, chemistry and food fields.

In addition to the “ core subjects” the syllabus includes Organic Chemistry and Biochemistry, Microbiology, Hygiene, Anatomy and Pathology, Health legislation.

## **Vocational Farming Course**

This Course is aimed at students interested in agricultural, environmental and agro-industrial matters. Besides learning to enhance, produce and market agricultural and agro-industrial products, students will also study how to prevent environmental degradation and to enhance the territory as well as to boost tourism . In addition to general subjects, the syllabus includes Information and Communication Technologies, Ecology and Pedology, Production Processes and Legislation, Rural Economics of Territory Development.

## **Vocational Hotel and Catering Course**

This Course trains enables students to work both in Tourism and in Catering . In addition to the “core subjects”, the syllabus includes French or German, Economics, Food Science, Cooking, Waitressing, Art of Pastry and Reception Activities. After a two -year training the students will get their specific qualification in Cooking, Waitressing, Art of Pastry or Reception Activities and apply for a job right away.

At the end of the school they get their high school certificate and they can either apply for a job or go to university. Students will be able to deal with Catering matters, become expert in beverages service or in Hotel and Tourism Management .

## **Vocational Services for Healthcare and Social Assistance**

At the end of this Course students will be able to provide the well-being of people from a healthy, psychological and social point of view. Students will be able to cope with people’s difficulties learning through problem solving. In addition to the “core subjects “the syllabus includes Psychology, Operative Methodologies, Economics and Social legislation, Hygiene and Medical Health Culture. After getting their high school certificate students may work in any Health Department or as Children entertainer or Activities Organizer for social communities, kindergartens, disabled centers or accommodation facilities. Starting from the third year, students will also attend the health care worker training course (O.S.S) held by the local Health Department with internship opportunities in public or private hospitals.

## **Vocational Beautician and Wellness operator Course**

Students will use all the most innovative techniques for body care and well-being as well as manual techniques, electromechanical equipment and beauty products . The four- year syllabus ends with a regional qualification exam which enables students to apply for a job immediately after a successful third year . At the end of the fourth year then, the students can run a beauty center. In addition to the “core subjects” the syllabus includes Aesthetic techniques, Massage techniques and Anatomy.

For those wishing to get a high school certificate it is possible to continue their studies attending the fifth year of the Services for Healthcare and Social Assistance course.
